

„Since we have two databases merged together we have no more issues with duplicated data records“

Would you like to consolidate different databases into one central?

No problem.

We will process this job for you. There are lots of facts which prove that having one central database is better than running several independent ones. We are glad to offer you our rich experience in CRM databases field and will run your databases consolidation seamlessly and without any duplicated data records.

Your personal benefits:

- ✓ Minimum cost
- ✓ Entire data transfer
- ✓ Error free integration
- ✓ Single central database
- ✓ Individual consulting

According to our experience several databases within one company may lead to chaos.

They contain duplicated records and the main sense of having CRM system is lost in this case.

The main reason why several databases exist is related in general to merging of several companies which have their own databases.

Our objective is to merge your databases together without losing data and keep the data structure intact.

Contact us today to get your personal offer.

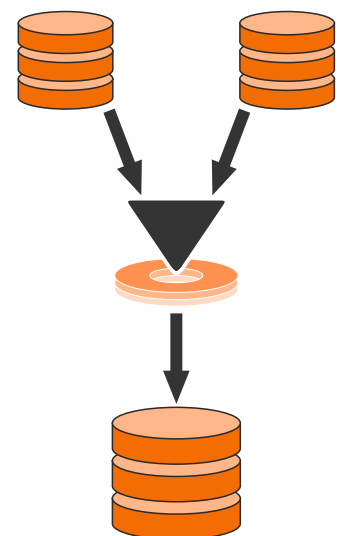

The pricing for merging two databases together is available on our website. In case you have more databases, please get in touch with us with details.

Highlights

- ✓ Structure generalization and data transfer
- ✓ Record Manager checking
- ✓ Transfer of all data types
- ✓ Data integrity
- ✓ Flexibility

for CRM-Systems

More details on the next page

*„Now we can work together as a team very
efficiency - Thank you!“*

Our Highlights:

- ✓ **Structure generalization and data transfer:** we generalize the data structure including individual fields, lists and custom tables and transfer it to a new database.
- ✓ **Record Manager checking: Act! Users** and teams are checked and new ones are created in case they do not exist
- ✓ **Transfer of all data types** the following entities can be transferred:
 - contacts
 - companies
 - groups
 - histories
 - notes
 - activities
 - documents
 - custom tables
- ✓ **Data integrity:** while merging the data, the attention to the data integrity is paid, this way all data records are transferred in the right format.
- ✓ **Flexibility:** the consolidation can be performed for more than 2 databases and for different types of databases. Please contact us for details.

6 Steps for successful databases consolidation:

- 1 **Get in touch with us** by email or phone to discuss what kind of databases you would like to have merged together.
- 2 **Create a backup** of your data and send us with respective access details.
- 3 **We make the consolidation** of the databases and provide you the access to the database
- 4 **You check your data** and should you have any questions get in touch with us by phone
- 5 If everything has been performed according to your requirements and you are satisfied, **we make the backup.**
- 6 **You receive the backup** with consolidated databases from us. We'd also be glad to help you with proper databases implementation for your business needs.

Use our services:

- ✓ Telephone consulting
- ✓ Chargefree ticketsystem
- ✓ Customer care
- ✓ Individual proceeding
- ✓ CRM-Forum
- ✓ Premium-Support*
